Git Hub Link: https://github.com/Abhishek-Kuthpady/test_app.git

Objectives:

- There are two steps of execution of application
- Code displays the welcome screen with below information:
  - Application name (`Phase 1 Assessment Project`) and the developer details (`Abhishek K`)
  - The details of the user interface including the options displayed during the process
  - Code is set to select one of the options listed
- The first option returns the current file names in ascending order.
- The second option returns the details of the user interface such as options displaying the following:
  - Add a file to the existing directory list
  - Delete a user specified file from the existing directory list
    - Returns a message if FNF (File not found)
  - Search a user specified file from the main directory
    - Display the result upon successful operation (`File df deleted from E:\eclipse_files\Locked ME\files`)
    - Display the result upon unsuccessful operation(`"Delete Operation failed. FILE NOT FOUND"`)
  - Option to navigate back to the main context (Go back)
- There should be a third option to close the application (Exit Program)
- The source code is pushed to your GitHub repository.
- The submission of your GitHub repository link is mentioned in the first of this file.
